1 **SEC. 2. FINDINGS AND PURPOSES.**

2 (a) FINDINGS.—

3 (1) IN GENERAL.—The United States Security
4 (‘USA’) Act of 2001 is a pact between the people
5 and their government, working together, marshaling
6 our vast resources, to keep America safe from ter-
7 rorism, drawing upon the American spirit, intellect
8 and creativity, breaking new frontiers, and setting a
9 standard for the world. The United States Security
10 (‘USA’) Act of 2001 is the product of a collaborative
11 effort of Members of Congress in consultation with
12 constituents and local, State and Federal officials
13 from throughout America.

1 (2) COMPREHENSIVE APPROACH TO PRO-
2 TECTING AMERICA FROM TERRORISM.—The Con-
3 gress finds that to better enable America’s cities,
4 towns, and rural communities to prevent, prepare
5 for and respond comprehensively to the threat of ter-
6 rorism, the United States must—

7 (A) adapt its public health infrastructure
8 and emergency preparedness and response sys-
9 tems to new threats;

10 (B) secure all modes of transportation and
11 the national transportation infrastructure;

12 (C) protect our national physical and infor-
13 mation infrastructure;

14 (D) while preserving the fullness of our
15 constitutional rights and liberties, in the wake
16 of September 11th, enhance its law enforcement
17 capabilities;

18 (E) better utilize intelligence assets to pre-
19 vent terrorist acts and better coordinate and
20 share information among intelligence agencies
21 and law enforcement organizations and between
22 levels of government;

23 (F) prepare, train and equip our military
24 to assist in the appropriate manner to combat
25 terrorism; and

1 (G) ensure the Office of Homeland Secu-
2 rity has the responsibility and authority to ef-
3 fectively coordinate the various Federal agencies
4 and departments and to integrate Federal,
5 State, local, and private efforts to combat ter-
6 rorism.

7 (b) PURPOSES.—The purposes of this Act are as fol-
8 lows:

9 (1) With respect to adapting our public health
10 infrastructure and emergency preparedness and re-
11 sponse:

12 (A) Ensure that our public health care sys-
13 tem is fully prepared and equipped to prevent,
14 prepare, and respond to mass acts of terror.

15 (B) Ensure that the Centers for Disease
16 Control and its scientists are equipped with
17 modern facilities and communications systems
18 and that the staff and facilities of the CDC are

21 potential terrorist targets, such as nuclear fa-
22 cilities, in obtaining sufficient stockpiles for any
23 outbreaks that may ensue.

4 Health with the necessary resources and tools
5 to enable its scientists to develop better re-

12 emergencies.

13 (G) Ensure that our children will be in
14 schools that have the planning, resources and
15 coordination to respond to emergency incidents.

16 (2) With respect to securing all modes of trans-

3 and rights of way.

4 (M) Develop and refine evacuation plans
5 involving the mobilization of mass transit.

6 (3) With respect to protecting our physical and
7 information infrastructure:

8 (A) The Federal government should use
9 risk management as an important element in
10 developing a national strategy for preventing,
11 preparing for, and responding to terrorism.

12 (B) Secure the country's limited oil refin-
13 ing capacity, which is essential to economic sta-
14 bility and prosecution of the military effort
15 against far-flung terrorist groups.

16 (C) Secure our chemical manufacturing fa-
17 cilities and secure the transport of chemical
18 substances from terrorist attack.

25 and storage.

1 (F) Secure our national fiber optic infra-
2 structure from physical attacks, sophisticated
3 exploitation, sabotage, and hacker attacks.

7 rorist attacks by improving detection, preven-
8 tion, and hardening security measures.

9 (I) Secure our national electric power grid.

10 (4) With respect to providing law enforcement
11 with what it needs to combat terrorism:

12 (A) To preserve our way of life against the
13 threat of terrorism, enhance the tools of law en-
14 forcement through the effective use of state of
15 the art technology while maintaining the full
16 complement of our Constitutional rights and
17 liberties.

18 (B) Enhance the readiness of Federal,
19 State, and local law enforcement personnel to
20 prevent, prepare for and respond to terrorism
21 through increased manpower, state of the art
22 equipment and training.

23 (C) Enhance the security of United States
24 Postal Service employees and the ability of the

21 (6) With respect to military preparedness, re-

23 (A) Consider chemical, biological, radio-
24 logical, nuclear, and other high-yield explosive
25 weapons as a potential threat to any part of the

3 terial stockpiles in locations such as areas of
4 the Former Soviet Union.

5 (B) Reduce the relative threat to American
6 territory and territories and military installa-
7 tions posed by the existence or proliferation of
8 radiological or nuclear weapons, expertise, or
9 related materials existing within, or exported
10 from, states that were part of the former Soviet
11 Union.
